

5 STEPS TO JUMPSTART YOUR WRITING

A Quick Guide to Get Started on Your Book

1

Clarify your big idea

Identify the core message or story you want to share. Write down why it matters to you, how you want readers to feel, and what they should learn after reading it.

2

Set realistic writing goals

Define achievable milestones for your writing. This could be a word count per week or finishing a chapter every two weeks. Keep goals manageable to stay motivated.

3

Create a loose outline

Draft a simple outline of your book, focusing on the main topics or events in each chapter. This is a flexible guide to keep you organized.

4

Find consistent writing time

Set aside dedicated time each day or week to write. Consistency is more important than long sessions, so make writing a habit.

5

Stay motivated with small wins

Celebrate small achievements like finishing a chapter or writing for a full week. These wins build momentum and keep you moving forward.
